Utah State Office
Summary Report of
Inspection for Cultural Resources

Report Number: U86BL399b

1. Report Title: Sevier Lake Diking
2. Development Company: M. C. Godbe, III
3. Report Date: 7-3-86
4. Inventory Date: 7-1-86
5. Resource Area: Warm Springs
6. County: Millard
7. Field Work Location: Map Reference: Headlight Mtn. UT

TWN <u>22S</u>	Range <u>T1W</u>	Section(s) <u>29, 33</u>
TWN <u>22S</u>	Range <u>T2W</u>	Section(s) <u>14</u>
TWN <u> </u>	Range <u> </u>	Section(s) <u> </u>
8. Description of Examination Procedures:
The route of the proposed road in section 33 was examined intensively.
No artifacts were found, so it was decided not to examine the two dike alignments (section 29 on the SE side of the lake, and Needle Point on the NW side of the lake).
9. Linear Miles Surveyed: 1
and/or
Definable Acres Surveyed:
and/or
*Legally Undefinable Acres Surveyed:
(*A parcel hard to cadastrally locate, i.e., center of section.)
10. Inventory Type: R
R = Reconnaissance
I = Intensive
S = Statistical Sample
11. Description of Findings (attach appendices, if appropriate):
No sites or isolated artifacts recorded.
12. Number Sites found: 0
13. Collection: No
14. Actual/Potential National Register Properties Affected:
None
15. Literature Search, Location/Date:
Richfield District Office, 7-3-86.
16. Conclusion/Recommendations:
Proceed with the project. See attached stipulations.
17. Signature: Craig B. Humm Date: July 3, 1986

STANDARD STIPULATIONS

- A. All vehicle traffic will be confined to existing roads and surveyed areas.
- B. Personnel will refrain from collecting artifacts and otherwise disturbing cultural resources in the vicinity.
- C. Should subsurface cultural resources be discovered during construction, construction will cease and the District Manager notified immediately. The cultural resource(s) will expeditiously be evaluated and mitigation measures, commensurate with the site's value and impact, instituted.
- D. Should it be necessary to deviate from the defined right-of-way, a cultural resource investigation will be conducted prior to disturbance.
